

You-centered care.

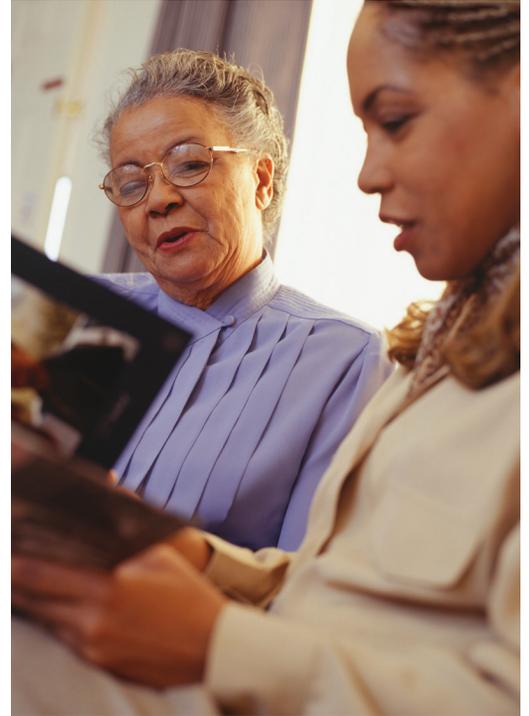

We know that dealing with the symptoms of a serious illness is difficult and can include exhaustion, anxiety and depression. We understand that pain and other symptoms affect your quality of life and can leave you lacking the energy or motivation to pursue the things you enjoy. At Pallitus Health Partners, we help people face serious health issues with care and thought so they can enjoy the best quality of life possible.

That's why we offer specialized care to make you more comfortable and improve your quality of life right now. It's called palliative care or advanced illness care. Think of us as specialty care experts who can minimize the impact your illness has on your life and ability to thrive.

Palliative Care can be provided at the same time as all other treatments and strives to provide you with:

- Expert treatment of pain and other symptoms so you can get the best relief possible
- Open discussion about treatment choices, including treatment for your disease and management of your symptoms
- Coordination of your care with all your health care providers
- Counseling and support for you and your family

Many adults and their caregivers living with illnesses such as cancer, heart disease, lung disease, multiple sclerosis, diabetes, kidney disease, ALS, dementia, and other illnesses, experience physical symptoms and emotional distress related to their diseases. Sometimes these symptoms may be related to medical treatments they are receiving.

It's Never Too Early To Start Palliative Care

You may want to consider Palliative Care if you or someone you love:

- Does not qualify for hospice care
- Suffers from pain or other symptoms due to ANY serious illness that is not well-controlled
- Requires frequent emergency room visits or repeat hospitalizations
- Is getting sicker or weaker despite efforts to feel better
- Feels overwhelmed and uncertain about the future
- Needs help understanding the health situation and coordinating care

To find out if your loved one could benefit from palliative care, call 502-814-5408 today.
