

Quality Cardiac Care

At Hosparus Health, our mission is to improve quality of life for those facing serious illness. As heart disease progresses, it can feel overwhelming – but you don't have to face it alone.

While advanced cardiac disease isn't curable, symptoms can be managed with the right care and support.

That's where we come in.

Our **Heart ConnectionSM program** provides specialized hospice and palliative care for individuals with advanced cardiac disease. Your care plan is customized to fit your needs and goals, in collaboration with your cardiologist, and delivered wherever you call home.

The program includes in-home visits from our expert Care Team – nurses, certified nursing assistants, social workers, chaplains, and volunteers – as well as 24/7 clinical support and care coordination. You'll also receive our Symptom Management Toolkit to help you monitor changes and stay in control of your condition.

Heart Failure

CERTIFIED IN HEART FAILURE CARE

Hosparus Health is certified in Palliative/Hospice Heart Failure Care by the American Heart Association – a recognition that reflects our commitment to expert, compassionate care.

This certification affirms that our Heart ConnectionSM program meets rigorous standards and follows the most current, evidence-based guidelines for managing heart failure in hospice and palliative settings.

HEART CONNECTIONSM

Specialized Care for Advanced Cardiac Disease

HOSPARUS HEALTH[®]

HEART CONNECTIONSM STATISTICS:

- Patients enrolled in the program live **3 times longer** on average than those who are not enrolled.
- Fewer than **2%** of enrolled patients require a return to the hospital.

Who Can Benefit From Heart ConnectionSM

- Have you been diagnosed with advanced heart disease?
- Do you have a history of cardiac arrest?
- Are you living with chronic chest pain or angina?
- Are your heart medications no longer controlling your symptoms?
- Are you experiencing more trouble breathing than usual?
- Have you had multiple hospital stays or ER visits?
- Have you noticed unexplained weight gain or loss?
- Do you have other chronic conditions like diabetes, lung or kidney disease, or dementia?
- Have you been treated for heart disease but are no longer a candidate for additional interventions?

We're Here to Support You

If you answered yes to one or more of these questions, the Heart ConnectionSM program may be able to help. While there may not be a cure for heart disease, Hosparus Health can help you better manage your symptoms and improve your quality of life.

Heart ConnectionSM Services

Patients in the program receive:

- A Symptom Management Toolkit, which includes a journal, symptom guide, medication organizer, and tools to help monitor swelling (edema)
- 24/7 access to nurses and physicians for questions and symptom management
- Care coordination designed to reduce or prevent hospital visits
- A dedicated Care Team including a nurse, certified nursing assistant, social worker, chaplain, and trained volunteer
- A customized plan of care based on your goals and needs
- Ongoing education about living with advanced heart disease
- Support for your family, including grief and bereavement care
- In-home lab monitoring, as needed
- Seamless collaboration with your primary care provider and cardiologist
- Access to cardiac medications at home, including oral and IV options like diuretics and inotropes (for eligible patients)

Our Goals

The Heart ConnectionSM program is designed to help you:

- Reduce ER visits and hospital stays
- Manage symptoms wherever you call home
- Increase your and your family's understanding of your condition and treatment
- Focus on what matters most – your comfort and quality of life

At Hosparus Health, we help people with advanced heart disease live longer with fewer hospital visits – so you can...

Create more moments.
